Dairy Product Production Across the U.S.

Percent Share of U.S. Production, by Region

Milk Production, Butter, Cheese, Nonfat Dry Milk, and Ice Cream - 2006

(Also Shows Percent Share of U.S. Population)

Note: The West Central, East Central and South Central Areas were combined because fewer than three plants were reporting production of some of the products in the states in those regions.

- Even though the West region accounts for only 23 percent of the U.S. population, the region produces 41 percent of the total milk produced in the U.S.
- The Atlantic and combined All Central Areas region each represent approximately the same percent share of the U.S. population (38 percent), however the Atlantic region geographic area is much smaller in size and accounts for only 19 percent of the milk produced in the U.S.
- The West region produces the largest percent share of U.S. cheese, nonfat dry milk, butter, and milk production.
